I am a junior web engineer and I have been cultivating the love for coding in the past years, especially improving my knowledge of **JavaScript** and **React**. I am very passionate and driven to learn every day about new technologies.

Skills & Knowledge:

- TypeScript
- JavaScript
- Redux
- React.js
- Express
- MongoDB
- CSS3
- Sass
- HTML5
- Node

Work experience:

Brains & Brawn Studio:

Junior React Developer / October 2020 – present.

Contributed to the development of a web platform, using various technologies and languages such as **React.js**, **TypeScript**, and **postgresql** database.

Achievements:

- Typescript: The Complete Developer's Guide
- The Modern React Bootcamp
- JavaScript Algorithms and Data Structures Masterclass
- The Modern Javascript Bootcamp Course
- The Advanced Web Developer Bootcamp
- The Web Developer BootCamp

Projects:

Bug Track: [code](#)

Full stack application that let's the users create software development projects, while keeping track of reported software bugs and who are this submitted by. This application is built using **React.js**, **Redux** and **TypeScript**. To support the application I built a custom API using the **express** framework and **MongoDb** as the database

The Football App: [link](#) [code](#)

Full stack Web application which lets you create your own football teams by choosing between virtually any player in world. I built this application using the **React** framework and the **Redux** library while the authentication is handled using the **OAuth** Api by Google. I built a custom API for this application using **node**, **express** and the **MongoDb** database.

Jayne Selvaggio portfolio: [link](#) [code](#)

Developed and deployed product catalogue website that shows the artwork of artist Jayne Selvaggio. Working on this project helped me understand what it means to comprehend customer needs and satisfy their requests. I created this project using the **React** framework.
