Jonathan Gatti
Junior Web Developer

Personal Data:

Address: Wapping, London(UK)

Phone: 07853614488

Links:

Interpersonal Skills:

Excellent communication and interpersonal skills.

Reliable and hard working.

Experience in international and multicultural working environments.

Languages:

Fluent in English and Italian

Hobbies and Interests:

Reading
Football
Music
Running

I am a junior web engineer and I have been cultivating the love for coding in the past years, especially improving my knowledge of JavaScript and React. I am very passionate and driven to learn every day about new technologies.

Skills & Knowledge:

- TypeScript ▪ JavaScript ▪ Redux ▪ React.js ▪ Express ▪ MongoDb ▪ CSS3 ▪ HTML5 ▪ Node

Work experience:

Brains & Brawn Studio:
Junior React Developer / October 2020 – present.

Contributed to the development of a web platform, using various technologies and languages such as React.js, Typescript, and postgresql database.

Jayne Selvaggio portfolio: link code
React Developer / September 2020 – October 2020.

Developed and deployed product catalogue website that shows the artwork of artist Jayne Selvaggio. Working on this project helped me understand what it means to comprehend customer needs and satisfy their requests. I created this project using the React framework.

Achievements:

- Typescript: The Complete Developer's Guide
- The Modern React Bootcamp
- JavaScript Algorithms and Data Structures Masterclass
- The Modern Javascript Bootcamp Course
- The Advanced Web Developer Bootcamp
- The Web Developer BootCamp

Projects:

The Football App: code link
Web application which lets you create your own football teams by choosing between virtually any player in world. While building this application I had the chance to polish my skills with the React framework and the Redux library. I built a custom API for this application using node, express and the MongoDb database.

Twitch clone: code
A web application that emulates the popular streaming website Twitch. While working on this application I had the chance to get familiar with Typescript, using this language alongside React and the Redux library to build a strong application.

Web Framework: code
A custom made web framework. Building this framework with the Typescript language really made me understand its power, giving me a deep insight into OOP, composition and inheritance in thesoftware development world.
